### INSTRUCTIONS FOR USE

Hand washing:  
Wearing gloves does not exclude handwashing. Have short, unvarnished fingernails, short or folded sleeves, do not wear jewelry. Wet hand and wrists with running water. Add a dose of PHAGO'DERM SENSITIVE into the palm of the hand. Lather carefully for at least 15 seconds. Pay attention to fingertips and nails, and between fingers and thumbs as well as the wrists. Rinse thoroughly with water for at least 15 seconds. Dry hands thoroughly by dabbing with a paper towel. If it is necessary, use the paper towel to turn the tap off.

General patient hygiene:  
Apply to skin previously moistened. Lather. Rinse thoroughly with water. Dry by patting with a towel with particular attention to skin folds.

Pre-operative shower:  
Wet body and hair. Apply the soap. Wash the face and the upper body. Wash the legs and feet. Wash the genital area then lastly the anal area. Rinse thoroughly from top to bottom. Dry with a clean towel. Put clean clothes on.
