

# DECURA H<sub>2</sub>O<sub>2</sub> 3.6%

Product with sanitizing effect for the treatment of the skin and nails

## FEATURES

Hydrogen peroxide is a chemical compound with disinfectant and oxidant function and also used as whitening agent. Hydrogen peroxide is in general suitable for various fields, including medical and cosmetic sectors. In medical field it represents a disinfectant with a good power, effective against bacteria, bacterial spores, viruses and yeasts. It is particularly useful in preventing skin infections, on small wounds, and in reducing mouth irritation. In cosmetics, hydrogen peroxide is known as hair and teeth whitening agent. It is also used as an anti-acne product.
